I have suffered for over 20 years with Rheumatoid Arthritis, so this cream was perfect for me to test. I'm so thrilled that it earned the PTPA Seal of Approval!

Despite the fact that I take a number of medications for my arthritis, I still get achiness or soreness in some joints, specifically my hands, wrists, elbows and knees. My hands and wrists are really the most sensitive joints, because I use them all the time. Quite often I spread some of this cream on my right wrist and forearm and elbow and I received instant relief. In addition, the consistency was very creamy and easy to spread, and there is no scent or fragrance at all. This allowed me to continue to do whatever I was doing – which includes typing on my computer, doing needlepoint stitching, or just cleaning up the kitchen after a meal. If your hands hurt, it can affect your whole body and how you feel. Most activities we do in a day involve our hands.

Topricin® is an all natural, homeopathic pain reliever. It is completely safe to use, even on babies, children, pregnant women and the elderly (not there yet!). There are no side effects. No BenGay smell or cooling affect. Even Lara Spencer spoke about it on "Dish" on the Rachael Ray Show <http://www.topricin.com/rachael-ray-topricin>

Topricin® Pain Relief and Healing Cream is the nation's leading natural therapeutic topical treatment and is used by doctors and in hospitals across the country. The innovative, FDA-regulated formula brings together 11 homeopathic medicines that work synergistically to relieve pain associated with a wide range of ailments and injuries, including: fibromyalgia, arthritis, lower back and shoulder pain, sciatica, Carpal Tunnel Syndrome, and trauma and sports injuries. It stimulates the body's natural healing process, rather than mask the pain.

I highly recommend this cream to anyone suffering from arthritis, whether its chronic or just age-related. The relief is instant and very welcome!
