### [Topricin Junior Homeopathic First Aid Pain Relief](#)

Recently, my daughter fell down the stairs. We've always warn about playing on the stairs and to use a cliché, she finally learned her lesson. Unfortunately, that lesson came with some bruises and pain.

Ever since I sprained my ankle in my early twenties, I've relied heavily on topical [arnica](#) products to relieve my pain. I've used these same products on my children until I discovered Topricin makes a products designed for kids.

Topricin® Junior Children's Pain Relief and Healing Cream specially formulated for kids. Pediatrician recommended this paraben free, patent pending formula treats pain associated with a wide range of common children's injuries. It is perfect for muscle sprains and strains, eczema, back, heel and knee pain, and overall growing pains... Safe and effective, Topricin® Junior uses no volatile oils such as camphor or menthol or irritating chemicals. Rather, it stimulates the body's desire to heal the damage that is causing the pain by draining the toxins that build up in an injured area.

In addition to arnica, this product has 12 other homeopathic ingredients. It is designed for children ages two to twelve. My daughter did feel that it relieved her pain from the stair fall.

**Would I buy this product?** Maybe. I think this is a great, affordable product, I am just not sure why I would need a separate product for my kids than the adults in the family.

It's not as if the homeopathic remedies we use already have high potencies that concern me. I do like how five percent of sales are donated to children's health organizations by Topricin.
