Topricin – Homeopathic Pain Relief and Healing Cream

"Heal the Damages that Causes Your Pain"

Topical BioMedics, a natural medicines research company based in Rhinebeck, New York, has spent the last thirteen years engaged in their own innovative grassroots biomedicine revolution. From product developer, Lou Paradise, spending numerous hours as guest and host of talk radio programs providing information on holistic health practices and for years warning of the inherent dangers attributed to anti-inflammatory medicines, to the way Topical BioMedics creates and fosters relationships with their customers, to their premier product, Topricin, and its impressive ability to reduce soft tissue pain while building a lasting bridge between natural and conventional medicines. The future of pain management is here – and its name is Topricin! Topricin is the gold standard for safe, effective, side effect free, pain relief!

Topricin is the culmination of many years of research in the area of regulated natural medicines. The result is a patented topical biomedicine technology that incorporates a combination of homeopathic medicines that work synergistically to relieve pain and to reduce inflammation in joint and soft tissues (nerves, muscles, tendons, etc.). Topricin aids in the healing process by improving blood flow to injured tissue and by draining toxins and fluids that build up as a result of injury or ailments, like osteoarthritis. By doing so, Topricin goes beyond merely relieving symptoms but instead stimulates the body's ability to heal the damage that is causing the pain.

Topricin is odorless, greaseless and has no counter-irritants, volatile oils (capsaicin, menthol, camphor), or chemicals to irritate or burn the skin in hopes of numbing the pain, and it does not interfere with any medication. As a healing technology one of Topricin's major benefits is its ability to dramatically reduce dependency for all classifications of oral pain medication, from over the counter medicines, to prescription pain pills. Diminishing the risk of serious side effects and contraindications might just be Topricin's most socially valuable attribute.

Topricin is highly recommended by Medical Doctors, Pharmacist, Physical Therapists, Chiropractors and Massage Therapists who see their patients get better faster using Topricin during and after therapy sessions and can be used by anyone who suffers from: arthritis, carpal tunnel syndrome, sciatic/low back pain, tendonitis, bursitis, work/sports related trauma, fibromyalgia, shingles and neuropathy. It is also used effectively as a first aid to minor burns, insect bites and bruising.

There are many essential reasons why Topricin is better than other pain relievers on the market. Most importantly: Topricin does what it promises - it works. Instead of masking pain symptoms, Topricin's transdermal, micro-dosed medicines, go deep to where the pain originates and begins to heal the damage that's causing the pain.
