TOPRICIN® JUNIOR
NEW from Topical BioMedics, Inc.
The research and development leader in topical regulated natural medicines

Topricin® Junior

Introducing Topricin® Junior Children's Pain Relief and Healing Cream specially formulated for kids. Pediatrician recommended, this paraben- and petroleum-free formula treats pain associated with a wide range of common children's injuries. It's perfect for muscle sprains and strains, eczema, back, heel and knee pain, and overall growing pains. Odorless and formulated for easy absorption, it's also a multi-purpose healing cream for all the everyday bruising, scrapes, scratches, minor burns and insect bites that children are prone to. Topricin Junior does not contain any of the hazardous active ingredients found in many over-the-counter (OTC) oral pain medications, such as acetaminophen and ibuprofen, and uses no volatile oils such as camphor, menthol, and other irritating chemicals used in most OTC topical analgesics. Rather, it stimulates the body's desire to heal the damage that is causing the pain. With Topricin Junior, parents can take comfort in knowing that they are using a natural, safe, effective pain relief treatment on their little ones. *5% of gross sales donated to children's health charities.*
